

Task: 11.1 - Use Tkinter module for UI design

Aim:

To use Tkinter module for UI design

Problem: 11.1 - Write a python GUI program to create a label and change the label font style (font name, bold, size) using tkinter module.

Algorithm:

1. Import tkinter module
2. Create a main window
3. Create a label with desired text
4. Add the label to the main window pack()
5. Define a function to change font style
6. Create a button to call the function when clicked
7. Add the function to the main window
8. Start the main loop

Program:

```
import tkinter as tk

def change_font():
    label.config(font = ("Arial", 18, "bold"))

root = tk.Tk()
label = tk.Label (root, text = "Hello World !", font = ("Helvetica", 14))
label.pack()

button = tk.Button (root, text = "Change font", command = change_font)

button.pack()
root.mainloop()
```

11.2 Write a python GUI program to create three single line text box to accept a value from the user using tkinter module.

Algorithm:

1. Import and create the main window

Output:

HelloWorld!

Change Font

2. Add labels and textboxes to the main window
3. Add labels and set the size of text boxes
4. Create a button and get the values by the user to you when submitting the values
5. Get it and close the main window when the button is clicked

Program:

```
import tkinter as tk
root = tk.Tk()
root.title("Text. Box Input")
label1 = tk.Label(root, text="Enter value 1:")
entry1 = tk.Entry(root)
label2 = tk.Label(root, text="Enter value 2:")
entry2 = tk.Entry(root)
label3 = tk.Label(root, text="Enter value 3:")
entry3 = tk.Entry(root)
entry1.config(width=30)
entry2.config(width=30)
entry3.config(width=30)
def get_values():
    val1 = entry1.get()
    val2 = entry2.get()
    val3 = entry3.get()
    print("Value 1:", val1)
    print("Value 2:", val2)
    print("Value 3:", val3)
submit_button = tk.Button(root, text="Submit", command=get_values)
label1.pack()
entry1.pack()
label2.pack()
entry2.pack()
label3.pack()
entry3.pack()
submit_button.pack()
root.mainloop()
```

Result: Thus the program using tkinter module for
